**RE: L.E. CARPENTER PROJECT
WHARTON, NEW JERSEY
1986 ADMINISTRATIVE CONSENT ORDER
THIRD QUARTER 1994 PROGRESS REPORT**

Dear Ms. Purcell:

On behalf of L.E. Carpenter and Company, Roy F. Weston, Inc. (WESTON®) has enclosed the third quarterly report for 1994 covering the months of August through October in accordance with Paragraph 35 of the 1986 L.E. Carpenter/New Jersey Department of Environmental Protection (NJDEP's) Administrative Consent Order.

Project activities, performed during the period of August through October 1994, are presented within this report. Significant events included the submittal of a revised Workplan, a Freshwater Wetlands Permit Application, and a Stream Encroachment Permit for NJDEP review.

Results of this quarter's field activities indicate that within the shallow and intermediate aquifer zones groundwater elevation data identified groundwater flow in a similar direction and pattern as those previously observed at the site. Analytical results of the groundwater samples, when compared to second quarter 1994 results, identify an increase in the total concentration of benzene, toluene, ethylbenzene, and xylene in MW-4 and MW-25, and decreases or similar concentrations, in MW-14S, MW-15S, and MW-22.

Ms. Christina H. Purcell, Case Manager
NJDEP
